PROFESSIONAL SUMMARY

AI Software Engineer with 1.5+ years of experience building production-ready Generative AI and backend systems using Python and FastAPI. Hands-on experience in Retrieval-Augmented Generation (RAG), LangChain, LangGraph, multi-agent orchestration, and LLM-powered chatbot applications. Skilled in scalable API design, async services, vector search pipelines and prompt engineering. Focused on system design, performance optimization, and clean backend architecture.

CORE SKILLS

Programming Languages: Python

Backend Frameworks: FastAPI, REST API Development, Async APIs

Generative AI: LLM Applications, RAG, Prompt Engineering, LLM Evaluation, Fine-Tuning

AI Frameworks: LangChain, LangGraph, LlamaIndex, MCP (Model Context Protocol)

Agent Systems: Multi-Agent Systems, Agent Routing, Agent Orchestration

Databases: PostgreSQL, MySQL, Vector Databases

Performance Tools: Redis, Celery, Background Job Processing, Caching

Architecture Concepts: Scalable Systems, Microservices, API Architecture, RAG Pipelines

Libraries: Pandas, NumPy

Developer Tools: GitHub, VS Code, PyCharm

PROFESSIONAL EXPERIENCE

AI Engineer | Generative AI Engineer

Rokkun Systems Private Limited —

Bangalore March 2025 – Present

- Developed and deployed production AI chatbot systems using RAG, LangChain, and multi-agent orchestration on Google Cloud (GCP).
 - Designed scalable FastAPI microservices for LLM-powered conversational workflows.
 - Built retrieval pipelines integrating vector databases with LLM reasoning layers.
 - Implemented async APIs and background processing for concurrent request handling.
 - Applied prompt engineering and agent routing to improve AI response quality.
 - Used Redis caching and queue-based processing to improve latency and backend performance.
-

Full Stack Developer Intern

Besant EdTech Private Limited —

Bangalore June 2024 – February 2025

- Completed industry training in backend engineering and API development.
- Developed Python backend services and REST APIs with database integration.
- Built modular backend components following clean architecture practices.

PROJECTS

ASTROMUNI.AI — AI-Powered Conversational Astrology Platform (Web + WhatsApp Bot)

Tech: Python, FastAPI, LangChain, LangGraph, RAG, PostgreSQL, Redis, Celery, WebSocket, Multi-Agent Systems, Zoho Billing

- Built and deployed a multi-agent LLM-based astrology platform on Google Cloud (GCP) with a live website and real-time WhatsApp chatbot supporting concurrent user interactions
- Designed an end-to-end conversational AI pipeline with orchestrator and specialized agents for intent-based routing and personalized predictions.
- Implemented LangGraph orchestration with modular prompts, tool-calling, and RAG for context-aware, efficient responses.
- Developed a scalable FastAPI backend with async APIs, WebSocket/SSE streaming, Redis caching, Celery, and Zoho Billing integration for low-latency, production-grade performance.

BUDIA — AI Powered Diet and Fitness Assistant Chatbot

Tech: Python, FastAPI, LangChain, LangGraph, RAG, Vector DB, Redis, PostgreSQL, Multi-Agent Systems

- Built a RAG-based AI chatbot for personalized diet and nutrition guidance using LLMs.
- Designed and implemented an end-to-end RAG pipeline with embeddings, vector indexing, and retrieval workflow.
- Developed a LangGraph-based multi-agent system for intent routing and context-aware responses.
- Engineered a scalable FastAPI backend with async APIs, Redis caching, and prompt optimization for low-latency performance.

COALMANDI— High Volume CoalTrading Platform

Tech: Python, FastAPI, PostgreSQL, Redis, Celery

- Developed high-throughput backend APIs for transaction processing using FastAPI async architecture.
- Implemented background task processing using Celery and Redis queues.
- Optimized PostgreSQL schemas and queries for faster data retrieval.
- Designed scalable backend workflows for concurrent transaction handling.

EDUCATION

Bachelor of Engineering – Computer Science

Don Bosco Institute of Technology, Bangalore

2020 – 2024

CGPA: 7.2

Pre-University

Dr. Channabasaveshwara Gurukul Science College

2018 – 2020

CGPA: 8.3

CERTIFICATIONS

- Hugging Face Agent Course Certification
- Hugging Face LLM Course Certification
- AI Fluency: Framework & Foundation Certification - Anthropic
- Python Full Stack Certification - Besant Technologies
- HackerRank Python Certification
- HackerRank SQL Certification
